CUSTOM MADE
CURTAINS

Curtains with contrast hem - bespoke printed featuring 'Sticks' in Bushleaf on Oatmeal Eco-linen

CURTAINS & BLINDS

Our range of curtains, roman blinds and roller blinds can be manufactured in your choice of design, colour & basecloth to suit your home. Select from our Ready-Made range of printed fabrics and plain basecloths, or Customise your own.

Our locally based workroom have over 40 years experience. Here in the studio we have been producing textiles for window furnishings for over 15 years.

Roman Blind - 'Mountainscape' in Cream on Indigo Heavyweight Linen

Stiffened Roller Blind – 'Silver Dollar Gum' in Bluestone & Stream on Oatmeal Eco-linen

OPTIONS

Full coverage print

Feature hem

Plain sheers

Curtains are a beautiful furnishing choice for large windows or houses that need a bit more help keeping out the heat and cold, especially when fitted with a pelmet. Our curtains can be lined with a thermal OEKO-TEX certified blockout lining, a translucent UV protective lining or left unlined.

Curtains are suited to any weight of fabric in our range, however it's worth noting that all natural fibres will exhibit some slight movement throughout the seasons as humidity rises and falls.

Most of our curtains are made with a relaxed fold or simple pencil pleat header, however a variety of heading styles are outlined on the following pages.

There are three main drapery options - curtains featuring an all-over print, plain curtains with just a feature panel near the hem, or plain sheers*

*Please note that our plain sheer curtains are only available when ordered alongside our printed curtains or blinds.

'Sticks' in Bushleaf on Oatmeal Eco-linen - Pinch Pleat curtains with translucent lining

There are a number of factors that influence the price of our curtains:

1) FABRIC SELECTION <ul style="list-style-type: none"> Stock fabrics are less expensive than custom printed fabrics Basecloth weight - heavier weight fabrics are more expensive Print coverage: an all over print will cost more than a feature hem 	3) LINING Choose from full Blockout, translucent lining or no lining (details on next page)
2) WINDOW DIMENSIONS The width and height of your window determines the volume of fabric required and the manufacturing cost.	4) HEADING STYLE Some heading styles such as Eyelet & Wave Fold cost a little more to manufacture (details of heading styles on next page) and some require more "fullness" than others.

FULL COVERAGE PRINTED CURTAINS

PRICE BASED ON A MEDIUM WEIGHT FABRIC, BLOCKOUT LINING & RELAXED FOLD HEADER

CURTAIN LENGTH	TRACK WIDTH

HEADING STYLES

Select a heading style from the range below. Relaxed Fold is our most popular - it is similar to a Wave Fold but the folds are not held in a structured, evenly spaced formation. Alternative heading styles are also available on request.

Relaxed Fold

Pencil Pleat

Wave Fold / S-Fold

Pinch Pleat

Eyelet

Tab Top

LINING OPTIONS

THERMAL BLOCKOUT LINING

- OEKO-TEX 100 certified – no harmful chemicals
- Full light blocking
- High thermal value
- Australian Made
- Protects your natural fibre curtains from UV

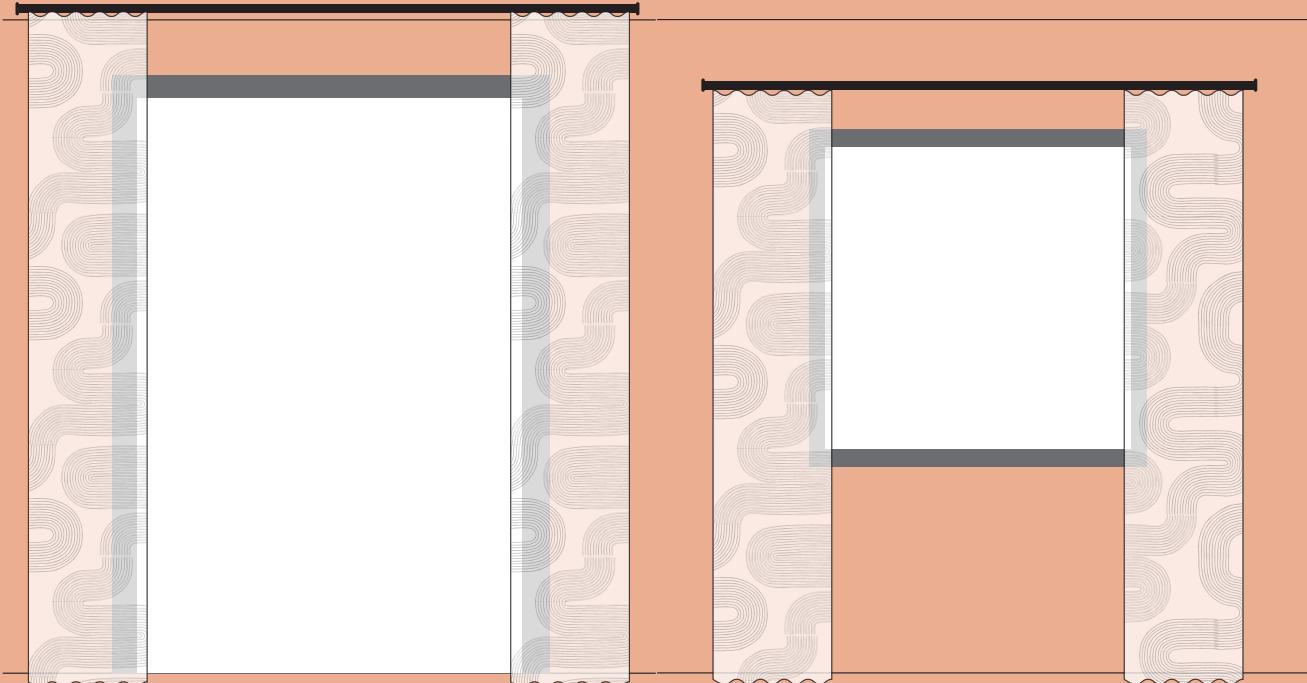

TRANSLUCENT LINING

- Allows some light to filter through whilst still providing privacy
- Protects your natural fibre curtains from UV

UNLINED

- Allows diffuse light to pass through the fabric
- Unlined sheer linens also allow visibility
- Best suited to windows protected from intense UV to prolong lifespan

MOUNTING OPTIONS

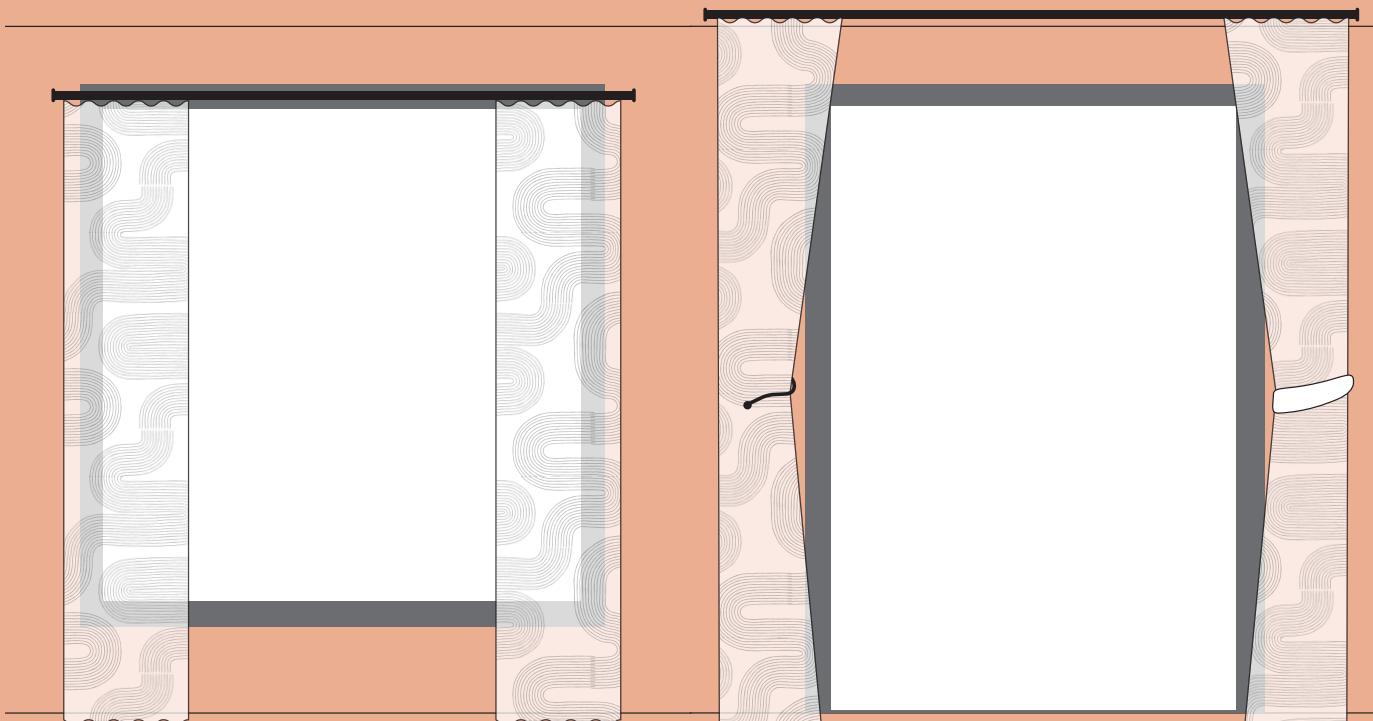

CEILING MOUNTED TRACK

- Allows curtain to stack clear of window/door
- Makes window/door appear larger
- Good for low ceilings

WALL MOUNTED TRACK

- Allows curtain to stack clear of window/door
- Makes window/door appear larger
- Good for high ceilings
- Allows flexibility in terms of height of track

ARCHITRAVE MOUNTED TRACK

- Only recommended when there are no other options
- Allows for a solid fixing surface if walls are weak
- Does not provide much space for stackback but the track can be extended approx 10-15cm beyond the architrave on both sides to minimise obstruction of the window

HOLDBACKS

We have two holdback options available:

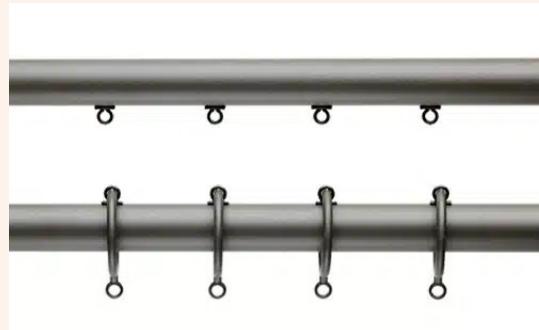

- 1) Fabric holdbacks made using the same print or basecloth as the curtain (or a contrasting fabric if desired)
- 2) Metal holdbacks from Vanda to complement your chosen track

TRACK STYLES

We have a range of track styles available to suit your aesthetic and budget. Our Vanda tracks are a simple yet stylish complement to our printed curtains, sitting visible above the curtain at all times.

In our Basic Track range, our Designer 15 and Streamline tracks are designed to fade into the background and are a good budget alternative without compromising on quality.

All tracks are also available as double tracks to accommodate a second sheer curtain behind.

Vanda tracks are available with either Glides or Rings

VANDA VERSATRAK RANGE

MIX AND MATCH ROD COLOURS & FINIALS

Riverstone with Flat Cap Finial

Black with Plain Cap Finial

Silver with Discus Finial

Bronze with Mushroom Finial

Ivory with Flat Cap Finial

White with Small Ball Finial

BASIC TRACK RANGE

Designer 15 Track

- Top fix only – best suited to ceiling or recess mounted
- Relaxed Fold curtains
- Curtain sits below track
- Available in Black or White

Streamline Track

- Best suited to Pencil Pleat & Pinch Pleat curtains
- Curtain covers track when closed
- Available in Black or White

'Grass' in Tasman on Off-White
Heavyweight Eco-linen

'Sticks' in Bushleaf on Oatmeal
Midweight Eco-linen

'Linear' in Inky Blue on Flax
Midweight Eco-linen

A feature hem is a cost effective alternative to full print curtains and can work well in spaces that need a more subtle design solution.

We produce feature hem curtains by printing a single or double repeat of our design on the fabric in the exact placement desired, no seams required. This however presents a limitation in terms of which prints suit best; the need to have an aesthetically pleasing repeat line (the area where two printed repeats interlock) which is not the case with all designs.

The following designs work well for feature hems:

- Grass
- Sticks
- Tea Tree
- Sawtooth Banksia
- Mountainscape
- Spotted Quoll
- Merri Creek
- Flowering Gum
- Silky Oak
- Sheoak
- White Faced Heron

- Gumflower
- Correa
- Buds
- Hakea
- Linear
- Kangaroo Paw
- Kurrajong
- Ficus
- Pebbles
- Shells

TRACK & HEADING IDEAS

'Grass' feature hem curtains with Relaxed Fold header & 25mm Vanda Versatrak

Relaxed Fold header with double 25/16 Vanda Versatrak

Wave Fold curtains with Vanda recessed

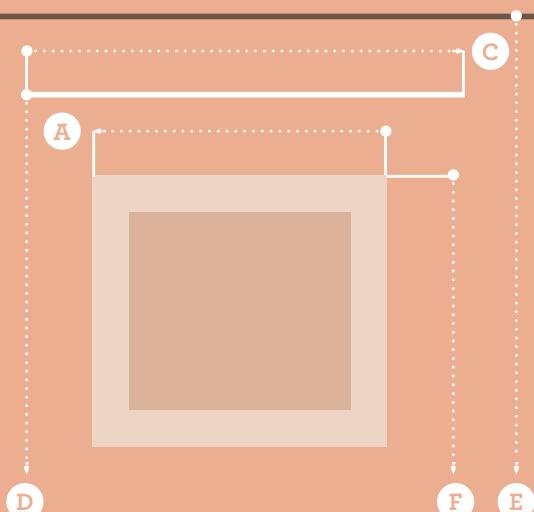

'Merri Creek' curtains with Pinch Pleat header & 25mm Vanda Versatrak

'Bracken' curtains with Pencil Pleat header, streamline track

Oatmeal sheer linen curtains with tab top curtain header

HOW TO MEASURE FOR CURTAINS

- A** Outside width of architrave
- C** Width of existing track
- D** Distance from runner eye to floor
(see image)
- E** Distance from ceiling or cornice to floor* (if no existing track)
- F** Distance from top of architrave to floor* (if no existing track)

*We do not recommend short curtains unless in specific circumstances. If you need shorter curtains please discuss.

WINDOWS WITH EXISTING TRACKS

If your window has an existing curtain track please provide measurements (C) and (D).

A photo of your existing track is useful to ensure it is compatible with our curtain header.

Please fill out the measure sheet for EXISTING TRACKS

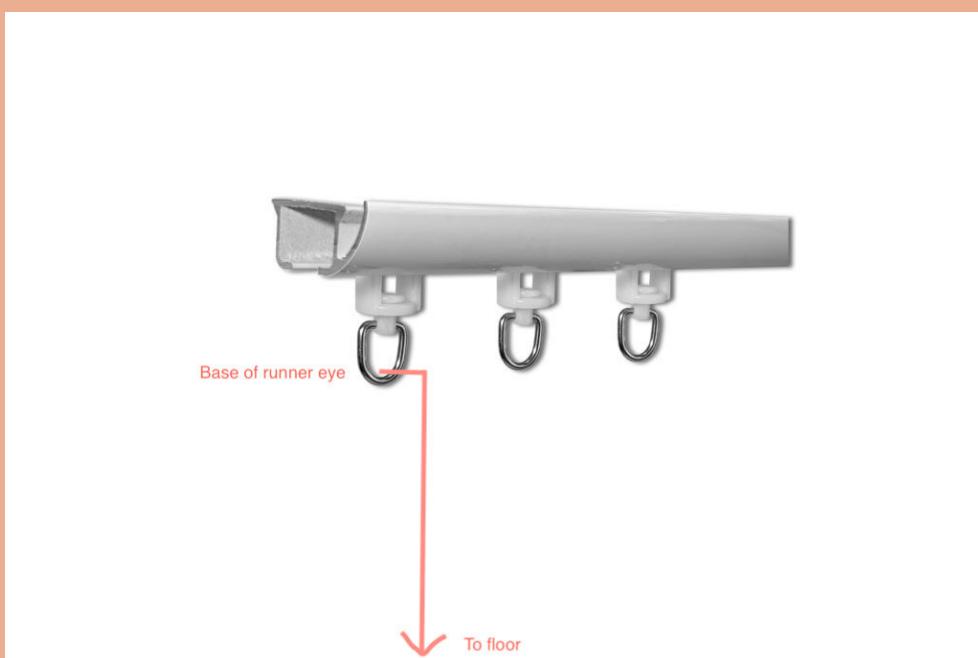

WINDOWS WITH NO EXISTING TRACKS

If there is no existing track please provide measurements (E) and (F) and also distance to any adjacent walls, structure or furniture (wall space for stackback).

If you would like your curtains to be drawn back completely clear of the window we need to allow approximately 1/6th of the window width on either side.

Please provide these measurements via email, along with your choice of fabric (Ready-Made or Customised) and preferred lining (blockout, cotton or unlined). A photo of your window is also very useful to ensure no details are missed.

RUNNER EYE TO FLOOR MEASUREMENT

FABRIC SUITABILITY

	CURTAINS	BONDED ROLLER BLIND	SHEER STIFFENED BLIND	ROMAN BLIND
OATMEAL LIGHTWEIGHT LINEN 160GSM	✓	*	*	**
BASALT & TERRACOTTA LIGHTWEIGHT LINEN 160GSM	✓	✓	✓	**
CREAM ORGANIC COTTON/HEMP 200GSM	✓	✓	✓	***
NATURAL 100% LINEN 200GSM	✓	✓	✓	***
MEDIUM-WEIGHT OATMEAL & FLAX ECO-LINEN 250GSM	✓	✓	✓	***
HEAVY-WEIGHT OFF-WHITE, OATMEAL & FLAX ECO-LINEN 370GSM	✓			✓
HEAVY-WEIGHT WASHED LINEN IN INDIGO, SPINIFEX, SPICE, HONEY & GRANITE 400GSM	✓			✓

* Suitable for single width roller blinds (less than 1350mm wide), unless print has a high ink coverage which will disguise any shadow lines along the vertical seams

** We recommend avoiding lightweight linens for Roman Blinds as they risk having a creased appearance.

*** Medium weight linens are still slightly prone to creasing especially in homes that have poor insulation / high humidity.

Creasing can be more noticeable on prints with pale inks (eg. Snow, Washed White) or prints with low ink coverage.

MOVEMENT

As our fabrics are made with natural fibres there may be seasonal movements and slight stretching over time. Blinds or curtains that meet the floor or sill need to be measured and/or mounted to allow for a small amount of stretch over time (up to 10-20mm).

UV EXPOSURE

Linen, organic cotton and hemp are all natural fibres, as a result they will eventually degrade when exposed to harsh UV light for long periods of time. The qualities we love about natural fibres (the fact that they can biodegrade and return to the earth at the end of their life) can also be their shortcoming. Windows that receive prolonged periods of direct sunlight (North or West facing windows without sufficient shading) are most at risk. For these windows we recommend a protective lining such as our Oeko-tex certified blockout lining or lightweight cotton/poly lining. As much as we celebrate and embrace natural fibres we also believe that the longevity of your product is of equal importance.

COLOUR CONSISTENCY

Our collection of basecloths are all made with natural fibres, most in their raw form with no dyeing or bleaching involved. As such there can be very minor seasonal colour variations between rolls of cloth. Our rolls are approximately 50m in length. Where possible we will complete each job from a single roll of cloth. However we cannot guarantee basecloth matching for jobs requiring greater than 50m, or the matching of products created at an earlier date. There is usually minimal visual difference between rolls.

PRINT QUALITY

Every length of meterage is hand-printed in our studio. It is a purely manual process and is therefore subject to subtle variations. Although we go to great lengths to ensure consistent output, it is impossible for hand-printed fabric to match the machine precision of manufactured fabrics.

Your custom printed length of fabric may exhibit some subtle imperfections in print quality. This is part of what gives hand-printed fabric its charm and beauty. There may be small areas which have slightly lighter or heavier ink coverage, or there may be minute variations in the ink colour as each batch of ink is mixed to a recipe by hand.

PATTERN MATCHING

Furnishings greater than approx 1300mm wide will require multiple drops which will be pattern matched. Roman or roller blinds will feature a full width centre drop, with two narrower drops on either side for symmetry. Due to the hand-printed nature of our fabrics there may be small inconsistencies in this pattern match - particularly with two colour prints. Below are some images to illustrate:

COLOUR SAMPLING

Colour sampling is highly recommended - please either purchase colour samples via our website or visit our showroom to view colours in person, as we cannot perfectly render our colours across all digital devices. Please note that the basecloth can slightly alter the appearance of a colour, so it is best to order colour samples on your basecloth of choice.

WINDOW FURNISHINGS - SELF MEASURING

If you are supplying your own window measurements please note that we cannot take responsibility for any mismeasurements or complications that have not been communicated prior to manufacturing. You are responsible for notifying us of any potential obstructions (furniture, fixtures, pelmets etc). If you are unsure as to how or where your blind will be mounted please talk to us and ensure you are fully informed. Retail customers providing their own measurements are encouraged to supply an image of each window to avoid any such complications. Any alterations or remake costs incurred are to be covered by the customer if the issue is a result of mismeasurement, obstructions or mounting issues.

ORDER CONFIRMATION

For custom orders of fabric or window furnishings it is the customers responsibility to check over all details & measurements on the invoice provided and ensure they are correct. We take no responsibility for changes made via email or phone where no written confirmation has been received.
